

# FALLING IN LOVE

words by Elisabetta Romanò

LIGHTS CHANGE COLOUR, DAYS GET SHORTER, AND COLD BECOMES MORE NOTICEABLE. AUTUMN IS A MAGICAL SEASON, WITH SOBER COLOURS AND DELICATE SUGGESTIONS, WHERE TO INDULGE IN CUDDLES IN HARMONY WITH NATURE.

FLORAL

When nature meets Kartell: a new, sparkling line of floral coverings has been created for some of the company's historical classics! As for **Trix**, Pietro Lissoni's transforming sofa, every piece, dressed in flowers, seems even more trendy.

**Diva** is a real glamorous seat, with an evocative name and embracing shapes. The new sofa by Borzalino invites to conversation and relaxation, thanks to the elegant velvet upholstery and especially to its soft lines with evident Art Deco references

AUTUMNAL

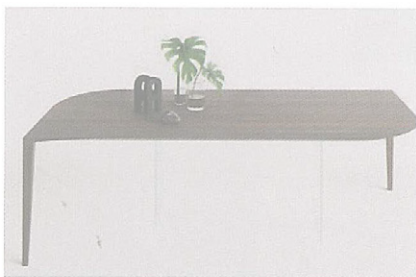

With the cold back in the air, the urge to hide in a warm and safe space is imminent. And what could be better than to snuggle up in the soft embrace of the linens from Hästens' **Satin Pure** collection, which now comes in seven new colours?

Autumn is here and the house is filled again with clothes and accessories that, often, no one knows how and where to place. A functional and witty solution to the disorder of hats and umbrellas is **Skyline**, the new coat stand by Calligaris: original and fun!

LEAFY

Like a leaf suspended in the autumn wind, the **P&J** table by Lago conveys a feeling of lightness and harmony. Thanks to the presence of two almost imperceptible glass legs in the middle, the final optical illusion is incredibly realistic.

**Flint** is the result of Giuseppe Viganò's imagination and his desire to satisfy an innate urge of being in touch with nature. The new luxury table by Smania, which belongs to the Nest collection, is made of ash, with leather inserts and tempered glass top.

LIGHT

Iconic, light, elegant and always trendy, this Arper armchair has an unmistakable look. Like an evergreen tree, **Leaf** seems not to suffer the passing of the seasons, always remaining a real design sculpture with a simple yet captivating silhouette

The inspiration behind **IRUPè** is the Victoria Amazonica, one of the world's largest aquatic plants. A lamp designed by Campana Brothers for Artemide, which aims to illuminate the world by making us reflect on important issues such as climate change.
